	TULPE GRILL	Version No.	4

1. IDENTIFICATION OF THE SUBSTANCE/ MIXTURE AND OF THE COMPANY/ UNDERTAKING

Product identifier	Tulpe Grill
Relevant identified uses of the substance or mixture	Cleaning/ maintenance detergent for professional use - oven and grill cleaner.
Supplier/ Manufacturer	UAB "BS Chemical", Baltijos pr. 123-9, LT-93224 Klaipeda, Lithuania, tel./fax.: +370 46 366279, www.bs-chemical.com
E-mail address for a person responsible for the safety data sheet	dovile@bs-chemical.lt
Emergency telephone number	112 (in Member State of EU).
	Estonia: 16662, calling from abroad (+372) 626 93 90. Hours of operation are during weekdays from Monday 9AM to Saturday 9AM (closed on Sunday and on national holidays).
	Latvia: +371 67042473. Service is available 24 hours.
	Lithuania: +370 5 236 20 52; +370 687 53378.
	Norway: 22 59 13 00.
	Poland: + 48 58 349 28 31, + 48 12 646 87 06, + 48 61 848 10 11, + 48 22 619 66 54 ext. 1240.

2. HAZARDS IDENTIFICATION

Classification of	Signal word: Dangerous	
the substance/ mixture	Hazard class: Skin corrosion, subcategory 1A.	P
according to	Hazard statements:	
Regulation (EU) No 1272/	H314 Causes severe skin burns and eye damage.	
2008 [CLP/	Precautionary statements:	GHS05
GHS]	P280 Wear protective gloves / protective clothing /use eye (face) protection.	
	P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do not induce vomiting.	
	P303 + P361 + P353 IF ON SKIN (or hair): Take off / remove all contaminated skin with water / jet.	l clothing. Rinse
	P305 + P351 + P338+P310 IF IN EYES: Rinse cautiously several minutes with contact lenses, if they present and it is easy to do. Continue washing eyes. I POISON CENTER and the doctor.	
Classification of	Risk phrases:	
the substance/ mixture	R35 Causes severe burns.	
according to	Safety phrases:	
Directive No 67/548/EEB	S26 After contact with eyes, rinse immediately with plenty of water and seek medical advice.	C Corrosive

The date of compilation:	2010-06-08
Revision:	2012-10-04
Version No.	4

S28 After contact with skin, wash immediately with plenty of water.

S36/37/39 Wear suitable protective clothing, gloves, use eye (face) protection.

S45 During an accident or if you feel unwell, immediately seek medical advice (if possible show this label).

3. COMPOSITION/ INFORMATION ON INGREDIENTS

Description of substance/ mixture

Mixture of substances listed below with no hazardous additions.

Hazardous components:

No.	CAS No.	EC No.	Index No.	Mass fraction, %	Name	Classification according to Regulation (EU) No 1272/ 2008 [CLP/ GHS]
1.	1310- 73-2	215- 185-3	011-002- 00-6	5 – 15	sodium hydroxide; caustic soda	Skin. Corr. 1A; H314

No.	CAS No.	EC No.	Index No.	Mass fraction, %	Name	Classification according to Directive No 67/548/EEB
1.	1310-	215-	011-002-	5 – 15	sodium hydroxide; caustic soda	C; R35
	73-2	185-3	00-6			

Note: explanations of hazard symbols, risk phrases and other signs are listed in Sections 2 and 16.

Components according to EU Detergents Regulation No. 551/2009:						
Nonionic surfactants	< 5					

4. FIRST AID MEASURES

Description of the first aid measures	In all cases if the damage to health occurred, seek immediate medical attention. If a person is unconscious do not give any water/ do not put anything into the mouth. In If substance/mixture poisoning case was discovered immediately contact the nearest Poisons control and information centre.
After inhalation	If inhalation of chlorine gas has occurred, immediately stop the contact - take out a suffering person to the fresh air, provide a peace. If respiratory impairment has occurred seek medical advice. If a person lost consciousness, lay him down steadily on a side and carry to the medical institution.
After skin contact	Immediately remove all contaminated clothing, at least $10 - 15$ minutes wash with plenty of water. If skin gets burned by substance/ mixture, not to use a soap. If symptoms of damage develop, seek medical advice.
After eye contact	Rinse opened eye as soon as possible, at least 10 - 15 minutes wash eyes with running water lifting and lowering eyelids. Remove contact lenses, if present and easy to do. Seek immediate medical attention.
After swallowing	Do not induce vomiting, do not give an active carbon. If a person

		Revision:	2012-10-04	
	TULPE GRILL	Version No.	4	
CHEMICAL				

is conscious, remove substance residues from mouth, rinse it with water, drink plenty of water and seek immediate medical attention.

Firefighting equipment must be selected assessing the properties

5. FIREFIGHTING MEASURES

Extinguishing media

	of around burning materials.
Special hazards arising from the substance/ mixture	It is necessary to know the properties of other chemicals or mixtures used or stored together.
Advice for firefighters	During the fire, wear respiratory protective equipment and chemical resistant/ protective clothing. Personal protective equipment must be chosen assessing the properties of burning around materials.
6. ACCIDENTAL RELEASE MEASU	RES
Personal precautions	Sufficient ventilation / respiratory protection/ contact with skin, eyes prevention.
Environmental precautions	Do not pour spilled material to the local drains, surface water, or nature environment.
Methods (material) for containment and cleaning up	Absorb with liquid-binding material (sand, diatomite, universal binders, sawdust). Residues neutralize and rinse with water. It is prohibited to discard the material in the trash basket or to pour back into the original container. Dispose gathered material according to the instructions.
Reference to other sections	View sections 8 and 13.
7. HANDLING AND STORAGE	
Precautions for safe handling	Store in a tightly closed original container, in a dry ventilated area. Do not store together with acids, strong oxidizing agents. Keep container tightly closed in the temperature not lower than -5°C and not more than +35°C and away from heat sources.
Conditions for safe storage	For the professional use only. Use only in a well ventilated area, where exhaust ventilation is equipped strictly in accordance with the instructions. Use common rules/instructions when working with chemicals. Do not mix with other chemicals. During the process do not eat, drink or smoke. Do not allow concentration of vapors in the air to exceed allowable threshold. Use appropriate personal protective equipment as indicated in Section 8.

8. EXPOSURE CONTROLS/ PERSONAL PROTECTION

Control parameters according to HN 23:2007 in Lithuania:

NameCAS Nr.Allowable concentration	
------------------------------------	--

According to Commissi	ion Regulation (EU) No. 453/		0010 0 5 5 5

		Version No.	4	
sodium hydroxide; caustic soda	1310-73-2 NR	$D 2 mg/m^3$ U		
Notes: NRD, TLV – not to be exceeded limit va	llue, U – acute effects.			
Appropriate engineering controls	General, local exhaut contact with this mixt	st ventilation. Avoid the ure, see Section 7.	spills, and any	
Personal protective equipment:				
General protective and hygienic measures	remove all soiled and	odstuffs, beverages and fe contaminated clothing. W of the work. Avoid conta	ash hands before	
Hand and skin protection	to the substance/ mixt check out with manuf	Protective gloves. The material of the gloves should be resistant to the substance/ mixture, alkalis. Penetration time of the material check out with manufacturer. Protective clothing, foot boots, it is necessary rubber apron.		
Eye protection	Wear safety glasses, face covering shields.			
Respiratory protection	In the case of insufficient ventilation, or in an emergency – the protection against aerosols must be used half masks with filtering against harmful liquid aerosols and valve filtering half masks against gases and particles.			
Environmental impact control	See sections 6 and 12.			
9. PHYSICAL AND CHEMICAL P	ROPERTIES			
Form	Liquid			
Color	Clear, light brown	Clear, light brown		
Odor	Specific			
pH, 100 %, 20-25°C	12,5 – 13,5			
The relative density, g/cm ³ , 20°C	1,09 – 1,12	1,09 – 1,12		
10. STABILITY AND REACTIVITY				
Chemical stability	Used according to stable.	specifications, under norr	nal conditions -	
Conditions to avoid/ incompatible materials	Active exothermic re ammonium salts.	Active exothermic reaction with acids and avoid contact with ammonium salts.		
Hazardous decomposition products	Reaction products dep the chemical reactions	bend on the substances/mix	tures involved in	
11. TOXICOLOGICAL INFORMAT	ION			
Toxicological offects		nical information it can		

Toxicological effects

On the basis of chemical information, it can be said that the mixture is not characterized by toxicity, when swallowed by test

_

		Revision:	2012-10-04
		Version No.	4
CHEMICAL			

animals (rats). The rates do not exceed an accute toxicity's estimates.

Skin: burns of various degrees, skin redness, blisters. Repeated or prolonged exposure may cause dermatitis. The damage depends on the exposure time and concentration of the solution.

Eyes: pain, tearing, vision changes, can cause irreversible damage to the eyes.

Inhalation: inhalation of aerosols can cause dyspnea, chest pain, and difficulty to breath, dizziness, headache. After a few hours pulmonary edema can occur.

Ingestion: chest pain, abdominal pain, dysphasia, drooling, mouth sores. If ingested, strong corrosive effects can be done to the mouth and larynx, esophagus and stomach perforation risk.

Additional toxicological information:

Primary irritant effect

12. ECOLOGICAL INFORMATION			
Toxicity	On the basis of chemical information, it can be said that the toxicity of the mixture to natural environment (fish) does not exceed the lowest toxicity value. Risk to the environment may occur due to changes in pH: pH 11,0 - 11,5, rapid loss of species; pH 9,2 trout and perch death.		
Persistence and degradability	On the basis of chemical information, it can be said that the product is biodegradable. The biodegradation process of mixture (surfactants) in the environment is in accordance with requirements of Detergents Regulation No 551/ 2009.		
Bioaccumulative potential	Not determined/ no data.		
Mobility in soil	Soluble in water, spread out. Before being released into waste water or sewage system must be diluted with water or neutralized.		
Other adverse effects	Threat to aquatic and soil organisms can be caused by changes in local environment's pH.		
13. DISPOSAL CONSIDERATIONS			
Disposal of product	Waste must be managed according to the Waste Management Act. Do not dispose in the trash, local and storm sewage system, surface water or environment. Codes of waste: 07 06; 20; 20 01 15*; 20 01 29*; 20 01 30.		
Disposal of packaging	Packaging waste must be handled according to Packaging and Packaging Waste Management Act. The product must be diluted with water or neutralized before released into sewage system. Washed and dried packaging can be reused.

14. TRANSPORT INFORMATION Land transport ADR / RID (international/internal transportation). Transport classification UN number 1824 Name and description MIXTURE OF SODIUM HYDROXIDE, SOLUTION Class 8 corrosive substances Cassification group C5 Packing group Π Labels 8 Hazard identification number 80 Special precautions for user Do not damage packaging.

15. REGULATORY INFORMATION

Information on legal regulations related to the substance / mixture:

- 1. Commission Regulation (EC) No. 286/2011; 1272/2008; 1907/2006.
- 2. Commission Regulation (EC) No. 551/2009.
- 3. HN 23:2007 "Occupational exposure limit values. Measuring the Impact Assessment and General Requirements".
- 4. European Agreement concerning the International Carriage of Dangerous Goods by Road (ADR).

16. OTHER INFORMATION

Explanations of Hazard symbols and numeric characters (described in Section 3):

Skin. Corr. 1A

Skin Corrosion, 1A subcategory.

This safety data sheet must be available to anyone who works with this type of chemical product. Data is in line with our current knowledge and it describes a chemical product, offers safety, occupational health, and environmental recommendations. This information will be added if new data about this chemical product will be ready. Material Safety Data Sheet does not disclose any specific chemical characteristics of the product.

This safety data sheet was reviewed assessing the requirements of REACH and GHS regulations. On December the 1, 2015 DSD mixture classification, labeling and packaging requirements will be replaced by CLP rule requirements. UAB "BS Chemical" refers to the CLP / GHS Regulations, and always keeps up to date Material Safety Data Sheets according to the chemical suppliers' Material Safety Data Sheets.
