

## ACID DETERGENTST- DISINFECTANTS FOR MILKING AND COOLING EQUIPMENT

### BS ACIP

Acid descaler (milk stone) remover

Cost-effective. For acid washing of pipes, tanks, coolers in milk production of the food industry. Dissolves inorganic plaque, oxidizes organic impurities, solutions are easily rinsed off.

Dosage: from 50 to 100 ml / 10 liters of water.

Suitable for use in water of any hardness. Packaging 20 l, 200 l, 1000 l.

### BS FARMACIP (without phosphates and nitrates)

Disinfectating acid detergent for circulating washing

A unique acidic disinfectant used in one- and two-stage washing systems. Dissolves inorganic impurities and oxidizes organic impurities. The solutions are easy to rinse and do not foam. Dirt sticks less to surfaces washed with BS Farmacip and can be used to wash all acid-resistant surfaces (aluminum as well).

Dosage: 50 - 150ml / 10 liters of water.

Suitable for use in water of any hardness. Packaging 20 l, 200 l, 1000 l.

### ECOCLEAN 201

Acid detergent for circulating washing

Strongly acidic, phosphoric acid based, detergent for surfaces. Effective against inorganic impurities, proteins and starch during the turbulent movements of solutions.

Dosage: 70 - 200ml / 10 liters of water.

Suitable for use in water of any hardness. Packaging 20 l, 200 l, 1000 l.

### ECOCLEAN 205

Effective acid lime (milk stone) remover

For acid washing of pipes, tanks, coolers in milk production of the food industry. Removes organic impurities. Solutions are easily rinsed off.

Dosage: from 60 to 80 ml / 10 liters of water.

Suitable for use in water of any hardness. Packaging 20 l, 200 l, 1000 l.
