

LIVESTOCK MILKING HYGIENE

UDDER HYGIENE BEFORE MILKING

FARM LAFOAM

Richly foaming dipper before milking for ideal cleanliness

Ready-to-use dipper before milking with lactic acid. The active foam evenly covers the entire surface of the teat and easily removes dirt. The ingredients soften the skin. Used with a special foam-making container.
Packaging 20 l, 200 l

FARM LAFOAM CONC

The concentrate for foaming dipper before milking.

Before use, dilute 1: 4 (1 L product: 4 L water). The prepared solution is used with a special foam making container. The active foam evenly covers the entire surface of the teat and easily removes dirt. The ingredients soften the skin.
Packaging 5 l, 10 l, 20 l
