

## SURFACES CARE AND DISINFECTION

### PREMISES, ANIMAL HOOFS, WALKWAYS DISINFECTION

#### BS QUATRIL EXTRA

Virucidal, fungicidal and bactericidal disinfectant

Neutral concentrated disinfectant for a very wide range of applications. Composition of the three active substances. Used for disinfection of livestock storage areas, transport, feeding areas. The effect against African swine fever was confirmed by conducted reaserch. Suitable for disinfecting barriers and baths for animal hoof disinfection. Long - term effects. Dosage: 0,25 - 1 % (2,5 - 10 ml/1 L water). Suitable for water of any hardness. Packaging 20 l, 200 l, 10 l.

#### BS PEROKSI 35

Hydrogen peroxide-based additive to enhance disinfection efficiency

Additive for final disinfection, doesn't need to be rinsed (decomposes rapidly into oxygen and water). Used for spraying on surfaces with the help of a fog generator (cold and hot fog); as an additive to disinfectant in acid detergents. Suitable for dosing with automatic dosing systems. Suitable for water of any hardness. Packaging 20 l, 200 l.

#### STERILFORTE

Concentrated peracetic acid based disinfectant

Effective against all types of microorganisms. Used in: circulating cleaning systems; aerosol disinfection (cold mist); in bathtubs; for surfaces spraying (foam devices, sprayers); as an additive in acid detergents. Doesn't foam, easy to rinse, works at low temperatures. Sterilforte is also used for final disinfection, has strong oxidizing, good deodorizing and stain cleaning properties. Easily decomposes into non-hazardous compounds after use. Dosage: 0,07 - 2 % (0,7 - 20 ml/1 L water). Suitable for water of any hardness. Packaging 20 l, 200 l.
